

Counting Scale KERN CFS

Professional, high-resolution counting scale with 100 item memories and second balance interface, counting resolution up to 75,000 points

Features

- Memory (PLU) for 100 items with additional text, reference weight and tare weight, e.g. of a container
- Precise counting: The automatic reference weight optimisation of reference weight gradually improves the average piece weight value
- Programmable using numerical key pad:
 - required reference quantity
 - known reference weight
- Three displays for weight display, reference weight, total pieces
- Weighing with tolerance range (checkweighing): a visual and audible signal helps with portioning, dispensing or grading
- Fill-to-target function: Programmable target quantity or target weight e.g. for checkweighing. A signal will be displayed when the target value is reached
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels

- Second balance interface to construct a high-resolution counting system, standard, e.g. with weighing bridges of KERN KFP V20
- Draught shield standard for models with weighing plate size **A**, weighing space W×D×H 155×141×80 mm
- Protective working cover included with delivery, for models with weighing plate size **A**, **B**

Technical data

- Large backlit LCD displays, digit height 20 mm
- Dimensions weighing surface
 - A** ø 80 mm
 - B** W×D 295×225 mm
 - C** W×D 370×240 mm
- Overall dimensions W×D×H
 - A** 315×350×110 mm / 315×350×185 mm (incl. draught shield)
 - B** 315×350×100 mm
 - C** 370×360×100 mm
- Permissible ambient temperature 0 °C/40 °C

Accessories

- **A**, **B**: Protective working cover, scope of delivery: 5 items, KERN CFS-A02S05
- Internal rechargeable battery pack, operating time up to 70 h without backlight, charging time approx. 14 h, KERN GAB-A04
- Signal lamp for visual support of weighing with tolerance range, KERN CFS-A03
- Y-cable for parallel connection of two terminal devices to the RS-232 interface on the scale, e.g. signal lamp and printer, KERN CFS-A04
- Further details, plenty of further accessories and suitable printers see *Accessories*

<p>Internal adjusting Quick setting up of the balance's accuracy with internal adjusting weight (motordriven)</p>	<p>Interface for second balance For direct connection of a second balance</p>	<p>Hold function (Animal weighing program) When the weighing conditions are unstable, a stable weight is calculated as an average value</p>	<p>Conformity Assessment The time required for conformity assessment is specified in the pictogram</p>
<p>Adjusting program CAL For quick setting up of the balance's accuracy. External adjusting weight required</p>	<p>Network interface For connecting the scale to an Ethernet network</p>	<p>Protection against dust and water splashes IPxx The type of protection is shown in the pictogram</p>	<p>DAkkS calibration possible (DKD) The time required for DAkkS calibration is shown in days in the pictogram</p>
<p>EasyTouch Suitable for the connection, data transmission and control through PC or tablet</p>	<p>KERN Communication Protocol (KCP) It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems</p>	<p>Suspended weighing Load support with hook on the underside of the balance</p>	<p>Factory calibration (ISO) The time required for Factory calibration is shown in days in the pictogram</p>
<p>Memory Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.</p>	<p>GLP/ISO log intern The balance displays weight, date and time, independent of a printer connection</p>	<p>Battery operation Ready for battery operation. The battery type is specified for each device</p>	<p>Package shipment The time required for internal shipping preparations is shown in days in the pictogram</p>
<p>Alibi memory Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.</p>	<p>GLP/ISO log Printer With weight, date and time. Only with KERN printers.</p>	<p>Rechargeable battery pack Rechargeable set</p>	<p>Pallet shipment The time required for internal shipping preparations is shown in days in the pictogram</p>
<p>KERN Universal Port (KUP) allows the connection of external KUP interface adapters, e.g. RS-232, RS-485, SB, Bluetooth, WIFI, Analogue, Ethernet etc. for the exchange of data and control commands, without installation effort</p>	<p>Piece counting Reference quantities selectable. Display can be switched from piece to weight</p>	<p>Universal plug-in power supply with universal input and optional input socket adapters for A) EU, CH, GB B) EU, CH, GB, US C) EU, CH, GB, US, AUS</p>	
<p>RS-232 Data interface To connect the balance to a printer, PC or network</p>	<p>Recipe level A The weights of the recipe ingredients can be added together and the total weight of the recipe can be printed out</p>	<p>Plug-in power supply 230V/50Hz in standard version for EU, CH. On request GB, USA or AUS version available</p>	
<p>RS-485 Data interface To connect the balance to a printer, PC or other peripherals. Suitable for data transfer over large distances. Network in bus topology is possible</p>	<p>Recipe level B Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display</p>	<p>Integrated power supply unit Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request</p>	
<p>USB Data interface To connect the balance to a printer, PC or other peripherals</p>	<p>Totalising level A The weights of similar items can be added together and the total can be printed out</p>	<p>Weighing principle Strain gauges Electrical resistor on an elastic deforming body</p>	
<p>Bluetooth* Data interface To transfer data from the balance to a printer, PC or other peripherals</p>	<p>Percentage determination Determining the deviation in % from the target value (100 %)</p>	<p>Weighing principle Tuning fork A resonating body is electromagnetically excited, causing it to oscillate</p>	
<p>WIFI Data interface To transfer data from the balance to a printer, PC or other peripherals</p>	<p>Weighing units Can be switched to e.g. nonmetric units. See balance model. Please refer to KERN's website for more details</p>	<p>Weighing principle Electromagnetic force compensation Coil inside a permanent magnet. For the most accurate weighings</p>	
<p>Control outputs (optocoupler, digital I/O) To connect relays, signal lamps, valves, etc.</p>	<p>Weighing with tolerance range (Checkweighing) Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model</p>	<p>Weighing principle Single cell technology Advanced version of the force compensation principle with the highest level of precision</p>
